

# THIS IS MIMICO

**EQUIPPING  
YOUR Success**

MATAMATA INDUSTRIAL MACHINERY IMPORTS LTD

[www.mimico.co.nz](http://www.mimico.co.nz)

## Equipping Your Success since 1989

MIMICO is the leading supplier of heavy machinery to the quarrying, mining, earthmoving, contracting, farming, construction, recycling, forestry and rental industries.

The company was established in 1989 as an indent parts supplier based in Matamata, New Zealand. MIMICO then became New Zealand distributors of Moxy articulated dump trucks (ADTs), Hanomag bulldozers and compactors, and Masterscreen mobile screening plants.

We have continued to grow from there, and now distribute a range of world leading brands designed to help our customers increase their productivity and profits.

### Our brands

We are the New Zealand distributor for Metso rock crushers and screens (mobile plant,

fixed plant and parts), Kobelco excavators, ZF transmission and drive components, Epiroc (previously Atlas Copco) rock breakers and demolition equipment, Moxy articulated dump trucks, Superior wash plants and conveyors, Dynapac construction equipment, MDS trommels and apron feeders, Cesco concrete mixer bowls, and Lamella portable waste water treatment plants. Our sister company, Crane Sales New Zealand Limited, provides you with a total solution for crane equipment, parts sales and service.

### We are nationwide

We operate a modern heavy machinery workshop, parts store, adjoining offices and training facilities in Matamata. Sales and service branches are also located in Auckland, Wellington and Christchurch, as well as a network of service dealers across the country.

### Our brands

# KOBELCO EXCAVATORS

Kobelco excavators provide greater performance and improved cost efficiency when compared to competitors' machines. With an international reputation for quality and reliability, the Kobelco range provides a quality excavator for every New Zealand application.

## The best excavator range in New Zealand

From compact mini excavators designed for urban worksites, to the ultra-tough, fuel-efficient Acera Geospec series and powerful large size excavators, Kobelco offers a full range to suit every need.

They all offer the advanced features you expect from Kobelco - outstanding cycle times, solid stability, tough durability, fuel-efficiency and simple maintenance, while setting new standards for environmental responsibility.

MIMICO is the distributor for Kobelco excavators in New Zealand. Kobelco is a subsidiary of the Kobe Steel Company, which began manufacturing electric mining shovels in 1930, followed by steam shovels and modern hydraulic excavators.

Kobelco is a world leader in new fuel-efficient and emissions efficient excavators that will meet the toughest environmental standards. Using new technologies, the latest 20 ton Kobelco models are 20% more fuel efficient, reducing operating costs. Buyers need to take these efficiencies into account in calculating the comparative value of different makes and models of excavator.

The Kobelco range features compact radius and full back end models, plus models designed to increase productivity by working long hours without refueling.

The Kobelco range provides a quality excavator for every New Zealand application. MIMICO is the NZ distributor for genuine Kobelco parts, with workshop and mobile service support nationwide.

# METSO CRUSHING & SCREENING EQUIPMENT

## Mobile plants

Metso mobile crushing and screening plants are proven performers in the toughest New Zealand quarrying, construction and recycling applications.

Metso is a leader in the design and manufacture of crushing and screening equipment, including Lokotrack mobile plants, making robust units with intelligent computer controls. Automation delivers maximum output for minimum input.

Mobile plants are ideal for New Zealand quarries because they can be used in multiple locations to produce multiple products, and be placed close to the rock source to minimise cartage. In contracting and recycling situations, tracked models are easily moved from project to project to process a wide variety of product.

Closed or open circuit options are available, and computer controls can be linked to other Metso plant to provide process automation. Whether you are quarrying, contracting or recycling, MIMICO gives you access to a global database of specifications, applications and performance data that makes pre-purchase planning easy.

## Mobile screening plants

MIMICO has the best range of top brand mobile screening plants for New Zealand quarries, contractors and construction companies.

Do you want to screen quarry rock, sand, topsoil, bark, lime, coal, concrete, waste, stock food or demolition material? Are you working in confined locations? High volume or lower volume? MIMICO has the right machine to suit your needs.

For consistent high end production, Metso's medium and high capacity scalping and finishing screens are robust and reliable, quick to set up and perform day in and day out. If you prefer a mobile plant on wheels, MIMICO has those options covered too.

## Fixed plant

Metso's crusher range - including the Barmac VSI and Nordberg HP and GP cone crushers - are proven performers in New Zealand and around the world. There is a crusher for every application, each with performance data you can rely on.

Metso screens have a history of productivity, capacity and reliability. Plant accessories such as replacement conveyor belts, rollers and wear parts are readily available. MIMICO is the NZ distributor for Trellex screen media, and stocks other popular screen media and accessories.

# MAXIMISE YOUR OPERATION

## Superior wash plants and conveyors

Superior Industries engineers and manufactures ground-breaking, bulk material processing and handling equipment and cutting-edge machinery components. Superior supplies wet processing solutions to meet the stringent material specification needs of the market and will wash and classify bulk materials to an impeccable specification. Superior is the number one conveyor manufacturer in the world for bulk material handling and is the world's largest builder of portable bulk handling conveyors.

## OEM wears & spares

MIMICO distributes genuine Metso wear and spare parts for mobile and static plant throughout New Zealand and the Pacific. Our parts division hold stocks of common Metso wears and spares for static crushers, such as the Barmac VSI, and the Lokotrack mobile range. This includes exchange rotors, new impact hammers, side liners, breaker bars, jaws, bearings and cartridges, and drive belts, plus the hardware to fit them all.

Visit [www.mimico.co.nz/about-us/brands/superior](http://www.mimico.co.nz/about-us/brands/superior)

## MDS Trommels & Apron Feeders

MDS International designs and manufactures state of the art trommels and apron feeders that provide unparalleled productivity and can screen rocks as large as 1.25 metres. These trommels are packed with unmatched features such as remote control, modular drums, drum cleaners and electronic systems to monitor and control aspects of the trommel. MDS trommels are built for tough conditions and built to last, with capacities from 350 to 1000 tons per hour. From mobile, semi-mobile or static there is an MDS trommel to suit your needs.

Visit [mimico.co.nz/about-us/brands/mds-international](http://mimico.co.nz/about-us/brands/mds-international)

# ENGINEERING SOLUTIONS

## MIMICO Engineering

MIMICO Engineering specialises in providing solutions to the quarry industry. This includes full process and plant design, improvement/upgrade of existing equipment which can include retro-fitting new equipment to maximize output, installation of new equipment and plant maintenance.

Our product offering includes screens (including two deck screens, three deck screens, wash screens and screening plants), bins and feeders (including hoppers and vibrating & belt feeders), conveyors and stacking conveyors, plus guarding, screw dewaterers (including 600, 900 and 1200 screws) and Lamella clarifier/thickener portable water treatment systems.

## Plant optimisation

Is your crushing and screening plant due for an upgrade? MIMICO can show you how to make existing plant more efficient and more productive. We use Metso's world-leading Bruno plant optimisation software to take the guesswork out of design and improvement. We have access to Metso's international database of plant specifications, applications and performance data. We will work with you to plan an upgrade or new plant, then design and build to meet your needs.

## Waste water

Take the worry out of water treatment at quarries and construction sites. MIMICO's Lamella clarifier/thickener is a portable water treatment system designed specifically for these sites.

This offers your business the proven, environmentally sound Lamella treatment process. Equipment is fully transportable and can be assembled and operational in 3-4 hours. No operator is required; a full automation option is available for remote sites, meaning you can monitor or manage the plant's performance from anywhere in New Zealand. There are models to treat from 30m<sup>3</sup> to 800m<sup>3</sup> per hour.

# MOXY ARTICULATED DUMP TRUCKS

The Moxy Articulated Dump Truck (ADT), with its unique forward-mounted turning ring, sloping rear frame and free-swinging gear driven tandem bogie, has stability that is hard to match and performance that can't be beaten. It all comes down to more contact with the ground, better traction and use of power, and faster work with better results.

High productivity means more material moved every day. Moxy brings an increased level of innovation to the productivity game. In every weight category, the Moxy ADT leads the industry with its superior body capacity.

MIMICO provides nationwide sales and product support for Moxy equipment, backed by the company's extensive parts availability. The Moxy MDT30 and Moxy MDT40 models are available in New Zealand. The MDT30 has a payload of 28,000kg and a capacity of up to 17.8m<sup>3</sup>, while the MDT40 can handle up to 40,000kg with its maximum capacity of 26m<sup>3</sup>.

The Moxy ADT is designed to work in tough conditions and travel at over 50 kilometres per

hour. Add to this its sure-footed traction in rough terrain and a quick-unloading tailgate and you get an ADT that delivers more, any way you look at it.

Even the best equipment needs regular maintenance. Moxy delivers everything needed for a long-lasting machine with a minimum of effort to achieve it: on-board diagnostic systems, easy component access plus a standard fleet management system.

Moxy's unique sloping frame provides better weight distribution. Other brands use rigid axles which lose traction and have a rougher ride. The Moxy frame is sloped downward from the hinge points to provide equal weight distribution on all axles when the truck is fully loaded. This provides a lower centre of gravity along with superior stability and tractive effort and better tyre wear.

# DYNAPAC COMPACTION & PAVING

Dynapac is one of the world's pre-eminent manufacturers of compaction and paving equipment with a wide selection of rollers, pavers, mobile feeders and planers.

The company's compaction range includes single-drum and double-drum vibratory rollers, combi rollers, steel drum rollers, pneumatic rollers and tamping compactors, while their paving equipment includes tracked and wheeled pavers, mobile feeders and screeds. Cold planers are designed to remove asphalt and concrete pavement in layers.

Dynapac presents exceptional end results based on experience, engineering expertise, and on numerous successful innovations, making it a winner when you compare performance, life-cycle cost and overall profitability.

Dynapac's range of rollers are used to compact all types of soil with the exception of rockfill. The rollers are suitable for most types of road construction, airfields, dam construction, harbour projects and industrial constructions.

A fantastic range of light compaction equipment that is Designed to Perform. Built to Last! Combined with Dynapac's decades of experience in the world of compaction, this range of equipment, which includes rammers, forward plates, reversible plates, and light rollers will ensure that you stay ahead of the game.

Dynapac offers a complete range of road paving equipment, with solutions for every paving application - big or small.

Dynapac's powerful, highly manoeuvrable, hydraulically powered planers are designed for cutting widths of 350 to 1000 mm at a cutting depth range between 100 and 300 mm. All of these cold planers have been developed for road maintenance jobs and other milling applications in asphalt or concrete.

## Epiroc rock breakers & demolition equipment

MIMICO is the New Zealand distributor of the Epiroc (previously Atlas Copco) range of machine-mounted hydraulic attachments. Products include Epiroc's range of rock breakers and demolition equipment. This equipment, which has been tested in the toughest conditions worldwide, is used by a wide range of businesses - from quarries to contractors.

MIMICO has an Epiroc breaker for every job - from the SB series, designed for carriers up to ten ton, to the HB series, designed for carriers as big as 140 ton. These breakers are designed to work hard in quarrying, contracting and demolition. All models are robustly designed and feature a compressed air function that keeps the area between the piston and tool free from dust.

Epiroc is a world leader in demolition equipment technology, with a model to fit every need. MIMICO distributes Epiroc's selection of plate compactors, combi cutters, bulk and demolition pulverisers, bucket crushers and hydraulic compactors.

Visit [www.mimico.co.nz/about-us/brands/epiroc](http://www.mimico.co.nz/about-us/brands/epiroc)

## CESCO Concrete Mixer Bowls

CESCO Fully Built Up (FBU) units are available in New Zealand, with replacement bowls available to suit locally manufactured units. These products are made from long-life rheemalloy steel and benchmarked for performance with innovatively engineered machine die-pressed steel blade system. Rheemalloy is a medium carbon steel offering superior tensile hardness properties compared to general structural grades making it ideal for the manufacture of CESCO's concrete mixer barrels.

Visit [www.mimico.co.nz/about-us/brands/cesco](http://www.mimico.co.nz/about-us/brands/cesco)

## UNIC mini-crawler cranes

UNIC mini-crawler cranes are renowned for superior lifting performance, wide operational range, ease of operation and unparalleled safety systems. These multi-purpose hydraulic cranes are engineered to handle a broad variety of lifting operations. The combination of pioneering design, precision manufacturing and advanced materials technology means these cranes are incredibly compact and lightweight, yet provide the capacity and reach of much larger cranes.

## Maxilift truck cranes

Maxilift offers a large range of mini truck cranes that include low column heights, overload protection devices and quality winches you can rely on. Designed specifically for use on a light-weight setup for small trucks and utes, service trucks and compact option larger trucks, Maxilift vehicle loading cranes have long gained a strong reputation in New Zealand for reliability and safety. Maxilift cranes offer a variety of bases, stabiliser configurations, enclosed and protected power packs and hoses, multifunctional proportional control valves and are very simple and easy to install.

For more visit [www.cranesales.co.nz](http://www.cranesales.co.nz)

## Effer knuckle boom and marine cranes

EFFER is a world leading producer of knuckle boom cranes ranging from 3 to 300 tonnes. The cranes come equipped with multiple boom configurations and remote maintenance software combined with the lightest possible tare weights in the market. There is a reliable yet extremely powerful EFFER crane to suit every kind of application.

EFFER's marine cranes have been designed for a wide range of applications including deck operations, shipboard, off-shore platforms, fishing and in the sea farming industry.

## Tommy Gate hydraulic Liftgates

Driven by a single hydraulic cylinder attached to aircraft-grade steel cables, the simple design of the Original Series liftgate has been perfected over the last fifty years. Driven by a single hydraulic cylinder attached to aircraft-grade steel cables, the simple design of the Original Series liftgate has been perfected over the last 50 years.

## Crane parts

Crane Sales NZ will source new and used parts from around the world – even hard-to-get. Any make, any model: Effer, UNIC, Rozzi, TAM, Kobelco, Tadano, Terex, NCK, Komatsu, Hyundai, Doosan.

# PARTS SUPPLY & SERVICE SUPPORT

## Parts supply

MIMICO's specialist parts division can source parts for heavy machinery from around the world - any make, any model.

We have been supplying parts for heavy machinery since 1989, and specialise in sourcing hard-to-find parts.

MIMICO is also the New Zealand OEM parts distributor for all the brands we distribute. We hold stocks of commonly requested parts.

## Service nationwide

We provide heavy machinery service across New Zealand, with three workshops and mobile service teams available nationwide.

Our 1100m<sup>2</sup> heavy machinery workshop in Matamata is custom-built for servicing heavy machinery and truck fleets, with four bays, a nine metre stud, a ten tonne gantry crane and modern truck wash.

Sales, parts and service branches are also located in Auckland and Christchurch, along with a service outlet in Paraparaumu and a network of service agents nationwide.

The workshop provides specialist repairs and service for: Quarry and construction machinery and plant; Excavators; Articulated dump trucks (ADTs); ZF off-road transmissions; Truck fleets.

## ZF parts & service

MIMICO provides a complete parts and service package for owners of off-road vehicles fitted with ZF transmissions, drivetrain components or axles.

MIMICO is the OEM supplier and repairer for ZF components in these vehicles, and New Zealand distributor for ZF concrete mixer drives. A wide variety of off-road vehicles are fitted with ZF transmissions and components. Most are found in the quarrying, contracting, forklift and agricultural industries.

Our heavy machinery workshop in Matamata features the latest ZF off-road test bed equipment and a specialist transmission workshop. The test bed allows staff to run off-road transmissions in the workshop to diagnose faults. Once repairs are complete, transmissions are tested again to confirm the repairs and fine-tune performance.

Right next door to the transmission workshop is the MIMICO parts division which holds commonly requested ZF parts in stock.

## Machinery to order

We source new and low-hour equipment from around the world - any make, any model. There are often new or near-new machines available at considerably less than the new list price.

## EQUIPPING YOUR Success

**MIMICO** sells, hires and services heavy machinery for the quarrying, mining, contracting, construction, recycling and forestry industries.

We are the New Zealand distributor of **Metso** crushing and screening equipment, **Kobelco** hydraulic excavators, **Moxy** Articulated Dump Trucks, **Epiroc** rock breakers and demolition equipment, **Dynapac** construction equipment, **Superior** wash systems and conveyors, **MDS** trommels and apron feeders, **ZF** transmission and drive components and **Cesco** concrete mixer bowls.

These equipment brands are backed by our extensive OEM and indent **parts supply** and nationwide, factory-trained **service support** team.

Our sister company, **Crane Sales New Zealand Limited**, provides you with a total solution for crane equipment, parts sales and service.
