MIMICO®

MATAMATA INDUSTRIAL MACHINERY IMPORTS LTD

www.mimico.co.nz

MIMICO has been Equipping Your Success since 1989.

MIMICO is the leading supplier of heavy machinery to the quarrying, mining, earthmoving, contracting, farming, construction, recycling, forestry and rental industries.

The company was established in 1989 as an indent parts supplier based in Matamata, New Zealand. MIMICO then became NZ distributors of Moxy articulated dump trucks (ADTs), Hanomag bulldozers and compactors, and Masterskreen mobile screening plants.

We have continued to grow from there, and now distribute a range of world leading brands designed to help our customers increase their productivity and profits.

Our Brands

We are the New Zealand distributor for Metso rock crushers and screens (mobile plant, fixed plant and parts), Kobelco excavators, ZF transmission and drive components, Atlas Copco rock breakers, Kawasaki Z7 wheel loaders, Moxy articulated dump trucks, Cesco concrete mixer bowls, and manufactures Lamella portable waste water treatment plants.

Our sister company, Crane Sales New Zealand Limited, provides you with a total solution for crane equipment, parts sales and service.

We Are Nationwide

We operate a modern heavy machinery workshop, parts store, adjoining offices and training facilities in Matamata. Sales and service branches are also located in Auckland and Christchurch, a distribution centre in Paraparaumu, as well as a network of service dealers across the country.

KOBELCO EXCAVATORS

Kobelco excavators provide greater performance and improved cost efficiency when compared to competitors' machines. With an international reputation for quality and reliability, the Kobelco range provides a quality excavator for every New Zealand application.

The Best Excavator Range in New Zealand

From compact mini excavators designed for urban worksites, to the ultra-tough, fuel-efficient Acera Geospec series and powerful large size excavators, Kobelco offers a full range of excavators to suit every need.

They all offer the advanced features you expect from Kobelco - outstanding cycle times, solid stability, tough durability, fuel-efficiency and simple maintenance, while setting new standards for environmental responsibility.

MIMICO is the distributor for Kobelco excavators in New Zealand. Kobelco is a subsidiary of the Kobe Steel Company, which began manufacturing electric mining shovels in 1930, followed by steam

Kobelco produces low noise, fuel efficient excavators to meet diverse customer needs.

shovels and modern hydraulic excavators.

Kobelco is a world leader in new fuel-efficient and emissions efficient excavators that will meet the toughest environmental standards. Using new technologies, the latest 20 ton Kobelco models are 20% more fuel efficient, reducing operating costs.

Buyers need to take these efficiencies into account in calculating the comparative value of different makes and models of excavator.

The Kobelco range features compact radius and full back end models, plus models designed to increase productivity by working long hours without refueling.

The Kobelco range is split into three main categories:

- Hydraulic excavators (5-85 ton).
- Mini excavators (1-6 ton).
- Short rear swing excavators (0.9-30 ton).

The Kobelco range provides a quality excavator for every New Zealand application.

MIMICO is also the New Zealand distributor for genuine Kobelco parts, and provides workshop and mobile service support nationwide.

METSO CRUSHING & SCREENING EQUIPMENT

Mobile Plants

Metso mobile crushing and screening plants are proven performers in the toughest New Zealand quarrying, construction and recycling applications.

Metso is a leader in the design and manufacture of crushing and screening equipment, including mobile plants such as the Lokotrack LT220D and LT106 - making robust units with intelligent computer controls that are easy to use. Clever automation delivers maximum output for minimum staff input.

Mobile plants are ideal for New Zealand quarries because they can be used in multiple locations to produce multiple products, and be placed close to the rock source to minimise cartage. In contracting and recycling situations, tracked models are easily moved from project to project to process a wide variety of product.

Closed or open circuit options are available, and computer controls can be linked to other Metso plant to provide process automation.

Whether you are quarrying, contracting or recycling, Metso gives you access to a global database of specifications, applications and performance data that makes pre-purchase planning easy.

Metso is a global supplier of technology and services to customers in the process industries, including mining and construction.

Mobile Screening Plants

MIMICO has the best range of top brand mobile screening plants for New Zealand quarries, contractors and construction companies.

Do you want to screen quarry rock, sand, topsoil, bark, lime, coal, concrete, waste, stock food or demolition material? Are you working in confined locations? High volume or lower volume? MIMICO has the right machine to suit your needs.

For consistent high end production, the Metso ST2.8 and ST3.8 performs day in, day out. For moderate volumes and fast setup in multiple locations, the Metso ST2.4 and ST3.5 are robust and reliable.

If you prefer a mobile plant on wheels, MIMICO has those options covered too.

Fixed Plant

Metso's crusher range - including the Barmac VSI, Nordberg HP4 and Nordberg GP220 - are proven performers in New Zealand and around the world.

There is a crusher for every application, each with an international reputation and performance data you can rely on.

Metso screens have a history of productivity, capacity and reliability. Plant accessories such as replacement conveyor belts, rollers and wear parts are readily available. MIMICO is the NZ distributor for Trellex screen media, and stocks other popular screen media and accessories.

OEM Wears & Spares

MIMICO is the distributor of genuine Metso wear and spare parts for mobile and static plant throughout New Zealand and the Pacific.

Our parts division hold stocks of common Metso wears and spares for static crushers, such as the Barmac VSI, and the Lokotrack mobile range.

This includes exchange rotors, new impact hammers, side liners, breaker bars, jaws, bearings and cartridges, and drive belts - plus the hardware to fit them all.

MIMICO Engineering

MIMICO Engineering specialises in providing solutions to the quarry industry.

This can include full process and plant design, improvement/upgrade of existing equipment which can include retro-fitting new equipment to maximize output, installation of new equipment and plant maintenance.

Our product offering includes Screens (including 2 deck screens, 3 deck screens, wash screens and screening plants), Bins and Feeders (including hoppers and vibrating & belt feeders), Conveyors and stacking conveyors, plus guarding, and Screw Dewaterers (including 600, 900 and 1200 screws).

Plant Optimisation

Is your crushing and screening plant due for an upgrade? MIMICO's experienced process engineers can show you how to make existing plant more efficient and more productive.

Our engineers use Metso's world-leading Bruno plant optimisation software to take the guesswork out of design and improvement.

MIMICO has access to Metso's international database of plant specifications, applications and performance data. We will work with you to plan an upgrade or new plant, then design and build to meet your needs.

Waste Water

Take the worry out of water treatment at quarries and construction sites. MIMICO's Lamella clarifier/thickener is a portable water treatment system designed specifically for these sites.

Here's what it offers your business:

- The proven, environmentally sound Lamella treatment process.
- Fully transportable.
- Assembled and operational in 3-4 hours.
- Automated polymer mixing option.
- No operator required (full automation option for remote sites).
- Water recycling options.
- Monitor or manage the plant's performance from anywhere in New Zealand.
- Options to purchase or lease.
- Models to treat from 30 to 800m³ per hour.

Ask about our plant optimisation consultation package, and our design/build expertise for plant upgrades or new plants.

WORLD CLASS EQUIPMENT BRANDS

Moxy Articulated Dump Trucks

The Moxy ADT, with its unique forward-mounted turning ring, sloping rear frame and free-swinging gear driven tandem bogie, has stability that is hard to match and performance that can't be beaten. It all comes down to more contact with the ground, better traction and use of power, and faster work with better results.

Moxy brings an increased level of innovation to the productivity game. In every weight category, the Moxy ADT leads the industry with its superior body capacity.

MIMICO sells and supports the Moxy MDT30 and Moxy MDT40 in New Zealand. The MDT30 has a payload of 28,000kg and a capacity of up to 17.8m³, while the MDT40 can handle up to 40,000kg with its maximum capacity of 26m³.

Atlas Copco Rock Breakers & Demolition Equipment

Atlas Copco's range has been tested in the toughest conditions worldwide.

MIMICO has an Atlas Copco breaker for every job - from the SB series, designed for carriers up to 10 tonnes, to the HB series, designed for carriers as big as 140 ton. These breakers are designed to work all day, every day in quarry,

Our world class brands, including Moxy, bring an increased level of innovation to the productivity game.

contracting and demolition applications. All models are robustly designed and feature a compressed air function that keeps the area between the piston and tool free from dust. No matter what your rock breaking job, there's an Atlas Copco breaker to do the job.

MIMICO also distributes Atlas Copco's selection plate compactors, combi cutters, bulk and demolition pulverisers, bucket crushers and hydraulic compactors. This equipment is used by a wide range of businesses - from quarries to contractors.

Kawasaki Z7 Wheel Loaders

An EPIC generation. Efficient. Powerful. Intelligent. Comfortable. Kawasaki pioneered the Z-Link design to provide unmatched utility, high breakout force and efficiency in its loaders.

The Z7 generation implements brand-new patented technology, industry exclusive innovation, and input from owners and operators all over the world. The Z7 series is engineered from the ground up!

CESCO Concrete Mixer Bowls

CESCO Fully Built Up (FBU) units are available in New Zealand, with replacement bowls available to suit locally manufactured units. These products are made from long-life rheemalloy steel and benchmarked for performance with innovatively engineered machine die pressed steel blade system.

PARTS SUPPLY & SERVICE SUPPORT

Parts supply

MIMICO's specialist parts division can source parts for heavy machinery from around the world - any make, any model.

We have been supplying parts for heavy machinery since 1989, and specialise in sourcing hard-to-find parts.

MIMICO is also the New Zealand OEM parts distributor for all the brands we distribute. We hold stocks of commonly requested parts. Phone 0800 80 64 64 to speak to our parts staff or make a request via our website.

Service nationwide

We provide heavy machinery service across New Zealand, with three workshops and mobile service teams available nationwide.

Our 1100m² heavy machinery workshop in Matamata is custom-built for servicing heavy machinery and truck fleets, with four bays, a 9 metre stud, a 10 tonne gantry crane and modern truck wash.

Sales, parts and service branches are also located in Auckland and Christchurch, along with a service outlet in Paraparaumu and 15 service agents nationwide.

The workshop provides specialist repairs and service for:

- Quarry and construction machinery and plant.
- Excavators.
- Articulated dump trucks (ADTs).
- ZF off-road transmissions.
- Truck fleets.

ZF Parts & Service

MIMICO provides a complete parts and service package for owners of off-road vehicles fitted with ZF transmissions, drivetrain components or axles.

MIMICO is the OEM supplier and repairer for ZF components in these vehicles, and New Zealand distributor for ZF concrete mixer drives. A wide variety of off-road vehicles are fitted with ZF transmissions and components. Most are found in the quarrying, contracting, forklift and agricultural industries.

Our heavy machinery workshop in Matamata features the latest ZF off-road test bed equipment and a specialist transmission workshop. The test bed allows staff to run off-road transmissions in the workshop to diagnose faults. Once repairs are complete, transmissions are tested again to confirm the repairs and fine-tune performance.

Right next door to the transmission workshop is the MIMICO parts division which holds commonly requested ZF parts in stock.

Machinery to order

MIMICO don't just source parts. We also source new and low-hour heavy machines to order from around the world - any make, any model.

In a competitive marketplace, there are often new or near-new machines available at considerably less than the new list price.

MIMICO provides parts supply and service support through our nationwide network.

MIMICO is the leading supplier of heavy machinery to the quarrying, mining, earthmoving, contracting, farming, construction, recycling, forestry and rental industries.

We are the New Zealand distributor for **Metso** rock crushers and screens (mobile plant, fixed plant and parts), **Kobelco** excavators, **ZF** transmission and drive components, **Atlas Copco** rock breakers, **Kawasaki** Z7 wheel loaders, **Moxy** articulated dump trucks, **Cesco** concrete mixer bowls, and manufactures **Lamella** portable waste water treatment plants.

Our sister company, **Crane Sales New Zealand Limited**, provides you with a total solution for crane equipment, parts sales and service.
